

Axiom Dedicated Financial Services

Axiom provides end-to-end technology solutions for hedge funds, broker/dealers and the alternative investment industry. With client relationships built on trust, we help our customers optimize their IT investments with a holistic, flexible and affordable approach.

Within an environment of ever-changing advancements, Axiom understands that fund managers need to focus on their portfolios, not complex IT management solutions. Axiom's team of uniquely skilled professionals possesses decades of experience in the prime brokerage, hedge fund, and fund administration businesses. This allows Axiom to not only consult and advise firms, but also provide implementation and remediation services. Axiom's goal is to not only reduce our client's service costs but work with them to develop cutting edge solutions allowing them to separate themselves from the competition.

Dedicated Financial Solutions Detailed

Business Consulting Services

Axiom's professional team of experts provides technology and operations consulting for alternative investment firms. With nearly 50 years of combined experience with firms such as GE Capital, Price Waterhouse Coopers, Cognizant, and Ernst & Young, we advise clients on strategies to achieve business objectives including technology evaluation and optimization & business process automation. **Additional Information Available Upon Request*

Full Time/Part Time Staffing – Axiom

Experience has shown that technology staffing is a headache for fund managers. Locally staffed IT professionals either lack the skill set to properly manage complex networks or are overqualified, get bored and move on. Axiom's Temp/Perm IT Staffing eliminates this by providing full or part time resources at your facility with no recruiting fees. Axiom handles the backfilling, management, administrative and HR duties while you focus on your firm's success.

24/7 Helpdesk

Axiom's Network Operations Center (NOC) is staffed 24/7/365 by trained professionals ready to assist. Our 100% US based staff of knowledgeable and courteous professionals are eager to assist with any issues that may arise.

Trading Systems

Axiom has extensive experience with proprietary trading systems including Bloomberg, ECS OMS, Virtual Portfolio Manager, Imagine Derivatives and countless others. We partner closely with these software manufacturers to provide seamless support and software integration.

Network Monitoring/Reporting/Intrusion Prevention

Axiom's NOC continually monitors each piece of technology on a customer network. From firewalls, servers to printers, Axiom's advanced monitoring tools allow us to be alerted instantly if a piece of equipment is experiencing issues or is tampered with. Receive fully customized reports detailing the status of your network including software & hardware inventory, security patch status, disk space utilization and network uptime.

Security/Risk Management

Axiom manages our client's IT infrastructure using industry standard best practices. Our networks not only meet but exceed the highest security standards. Axiom has an unblemished record of successful Kroll/SEC audits passed.

Disaster Recovery Planning, Implementation and Hosting

Axiom partners with all major co-location facilities including Iron Mountain, Inernap, SunGuard and Rackspace providing industry leading Disaster Recovery Solutions. From basic email and file recovery to turnkey DR & relocation services, Axiom works with our clients to develop a custom disaster recovery strategy appropriate for each individual need.

Email Compliance Archiving

Through a partnership with Global Relay, Axiom offers its customers the Message Archiver, an industry-leading mutual fund compliance archiving and monitoring solution to securely store email and instant messages (IM) for regulatory compliance, audits and eDiscovery.

Whether communicating with investors, clients or employees, email and instant messaging have become principal business tools. Retention and management of these records is essential to protect your firm's intellectual capital and for adhering to best practices for investor comfort and regulatory compliance.

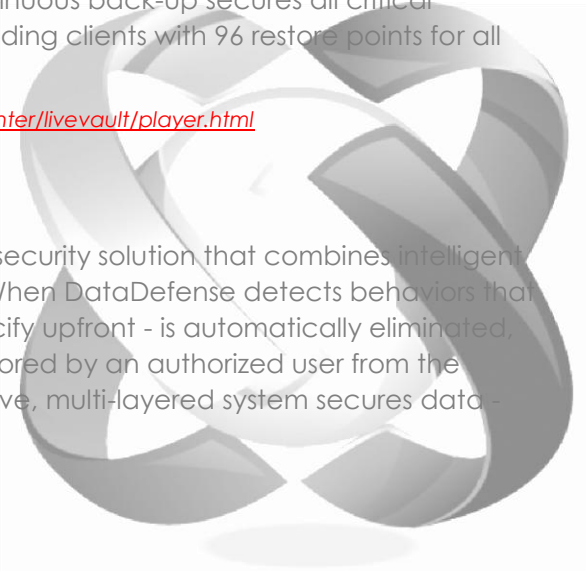

E-Vault SEC/SAS-70 Compliant Onsite/Offsite Data Storage

Through a partnership with Iron Mountain, Axiom offers customers continuous, secure backup of data on servers and workstations. Axiom's LiveVault continuous back-up secures all critical business data. A snapshot is taken every 15 minutes providing clients with 96 restore points for all business data in a 24 hour period.

Axiom DataDefense

Axiom DataDefense offers the first automated endpoint security solution that combines intelligent encryption with enterprise-controlled data destruction. When DataDefense detects behaviors that are inconsistent with authorized use, data - that you specify upfront - is automatically eliminated, and the PC or laptop is disabled. Data can be easily restored by an authorized user from the online vault. For even greater protection, a comprehensive, multi-layered system secures data - even when the PC is offline.

Voice Solutions

Axiom's voice solutions team has extensive experience in managing both internal LAN and external WAN telecommunication technology. From basic remote office voice solutions to complex trading floor turret solutions Axiom handles all of our client's voice and VOIP technology. Axiom has extensive experience with carrier technologies such as MPLS, T1, T3, DS3 as well as all layer 2 and layer 3 protocols. Axiom works directly with all major carriers to design & negotiate voice/data contracts lowering your bills and increasing your functionality.

Data Warehouse and Reporting

Our staff has extensive experience with data warehouse design and implementation allowing complete manipulation of data. Have complete control over your data with real time web based or excel based flexible reporting from multiple data sources. With Axiom Data Warehouse solutions the possibilities, flexibility and scalability is endless.
